Title
The List of SuMSO Terms

Description
This table provides the list of SuMSO terms. Reference for each term to is provided. We corresponded each term to the FSSMF pillar to which it primarily pertains.
The terms highlighted in blue are those currently covered within OWL SuMSO core ontological module. Terms presenting an "*" are those (also) proposed by stakeholders. Terms presenting a "†" are those stakeholders considered the most relevant and on which their contributions and suggestions for revisions mainly focused. Future implementations will incorporate the rest of the vocabulary and further terms into SuMSO.
The list does not include BFO and SCO terms. Only a few of SCO ones, those considered the most relevant for discussion with the stakeholders, such as "stakeholder" and "stakeholder role", were included in this list. SuMSO covers all BFO and SCO terms.
